NATIONWIDE REACH

LOCALLY MANAGED

Operating from purpose-built facilities in Queensland and Victoria, SS Signs is equipped to handle large-volume production and national rollouts. With a robust logistics network, we service every state and territory with consistent quality and fast turnaround times. Our team is experienced in coordinating complex installs across multiple sites while maintaining clear communication with project stakeholders.

Our local production capabilities mean:

- Faster response times to changes or add-ons
- Reduced freight and installation delays
- Tight QA/QC control across all touchpoints

WHY LEADING BUILDERS & DEVELOPERS CHOOSE SS SIGNS

End-to-End Project Management: One dedicated project manager from initial brief through to final install.

Construction-Grade Signage: Designed, engineered, and fabricated to withstand harsh environments, meet Australian Standards, and integrate seamlessly into construction schedules.

Technical Design & Documentation: Full CAD and shop drawings provided. Engineering certifications for footings and wind loads available.

Industry Compliance: White card installers, SWMS documentation, and knowledge of site access, crane lifts, and restricted installs.

Fast Turnaround: High-capacity equipment and streamlined workflows to meet tight construction deadlines.

Custom Fabrication: Tailored solutions for complex sites including high-rise, CBD, or confined access installations.

Safety First: All on-site works carried out under strict WHS protocols with full public liability and installation insurance coverage.

Multi-Tier Builder Experience: We work confidently across Tier 1, 2, and 3 construction projects, adapting to different protocols, compliance levels, and program complexity. From strict site access and CBD permitting for Tier 1 to fast, agile rollouts for Tier 3 contractors - we bring scalable processes to match your project.

EXPERIENCE ACROSS BUILDER TIERS

At SS Signs, we understand the operational expectations and compliance standards that come with every level of construction partner. Our project team is experienced in working across all tiers, adapting seamlessly to each builder's requirements:

Tier 1 Builders

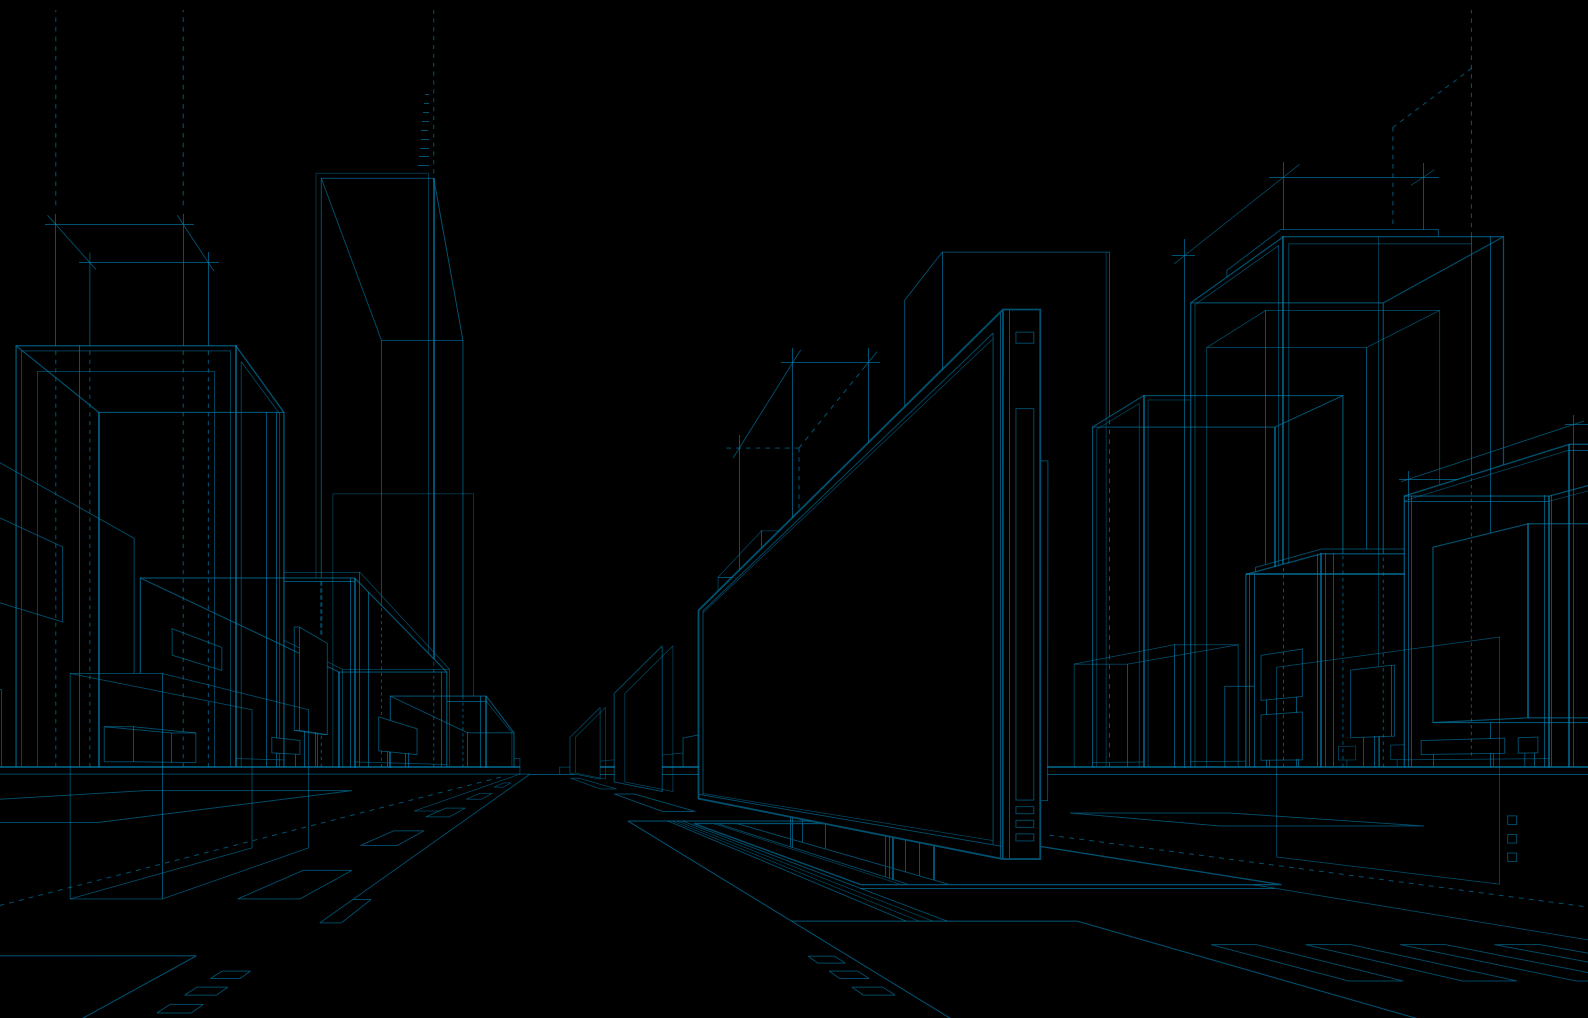

Experience with major infrastructure and high-rise projects involving detailed risk assessments, engineered lift plans, CBD permit applications, high-access installs, and strict milestone scheduling.

Tier 2 Builders

Proficient in managing large-scale residential, mixed-use, and commercial builds requiring detailed coordination, integrated shop drawings, and clear communication between site foremen and signage contractors.

Tier 3 Builders

Agile response to smaller project timeframes with flexibility around supply, install, and late-stage changes. Frequently engaged for signage refreshes, tenancy rebranding, and end-to-end delivery of site-specific signage.

SITE SAFETY MEETS BRAND VISABILITY

COMPREHENSIVE SIGNAGE SOLUTIONS FOR CONSTRUCTION PROJECTS

We deliver end-to-end signage solutions designed specifically for the built environment, including:

PYLON & MONOLITH SIGNAGE

- Custom-designed to your site, branding, and tenant mix
- Structural steel or aluminium frames engineered to AS/NZS standards
- Static, illuminated, or integrated with LED for variable messaging
- Refurbishment services for existing pylons (acrylic panels, LEDs, rewiring, repainting)

WAYFINDING, DIRECTIONAL & SITE IDENTIFICATION

- Pedestrian, vehicular, and delivery access signage
- Multi-tenant site directories and interpretive signage
- Compliant and intuitive wayfinding for both temporary and permanent installation
- Designed to reflect architectural intent while improving site usability

SAFETY & STATUTORY SIGNAGE

- Fully compliant with WHS requirements and Australian Standards Including:
- Entry Boards, Site Rules, Emergency Information Panels (EIPs), Statutory building signage, Look-Up Series, Exit/Fire signage
- Temporary and long-term installation options

HOARDINGS, BANNERS & BILLBOARDS

- High-impact promotional signage for perimeter fencing and developments under construction
- Mesh banners, ACM panels, large-format vinyl, illuminated billboards
- Council-compliant hoardings for commercial development sites

PYLON AND MONOLITH SIGNAGE

Engineered visibility. Designed to perform.

SS Signs specialises in the design, engineering, and installation of custom pylon and monolith signage tailored to your development's branding, location, and tenant requirements.

Whether freestanding at site entry, integrated into landscape architecture, or positioned for highway visibility, our pylons are built for structural integrity, maximum impact, and long-term durability.

Custom-built using structural steel or aluminium frames, engineered to AS/NZS standards Available in static, illuminated, or full LED configurations for dynamic, high-visibility messaging. Designed to support multi-tenant displays, wayfinding, or brand identity at scale. Refurbishment and upgrade services available for existing pylons, including re-skinning, rewiring, LED retrofitting, and compliance upgrades

With a full in-house team managing design, fabrication, engineering, and installation, we ensure your pylon signage delivers both visual presence and certified performance, on time, every time.

LED & ILLUMINATED SIGNAGE

LED SIGNAGE & DIGITAL DISPLAYS

- High-resolution LED screens for construction sites, retail precincts, and display suites
- Remote content control for real-time updates and promotions
- Ideal for developments with commercial leasing or shared tenancy requirements
- Full engineering, fabrication, software integration, and aftercare included

3D & ILLUMINATED SIGNAGE

- Fabricated acrylic, metal or aluminium letters for reception areas, entry points, or architectural feature zones
- Backlit, halo-lit, edge-lit and fully illuminated options available
- Designed to complement architectural finishes and elevate your brand presence

TEMPORARY & SITE-SPECIFIC SIGNAGE

- Corflute safety boards, vinyl banners, ACM directional signage, scaffold signage
- Custom signage kits for trade access, contractor zones, deliveries, and crane pads
- Quick production turnaround and bulk manufacturing capacity

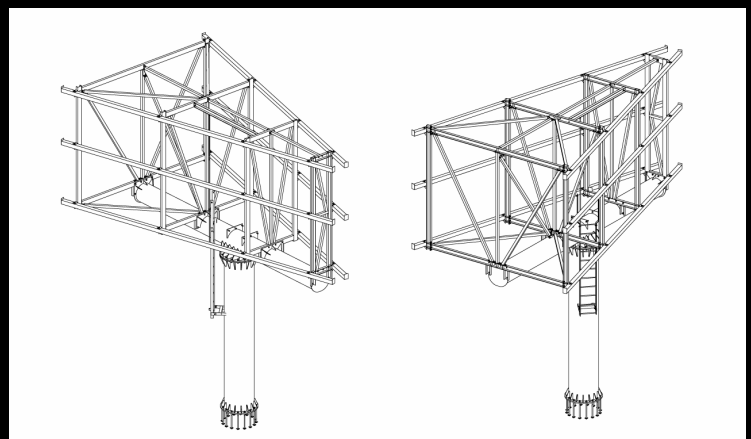

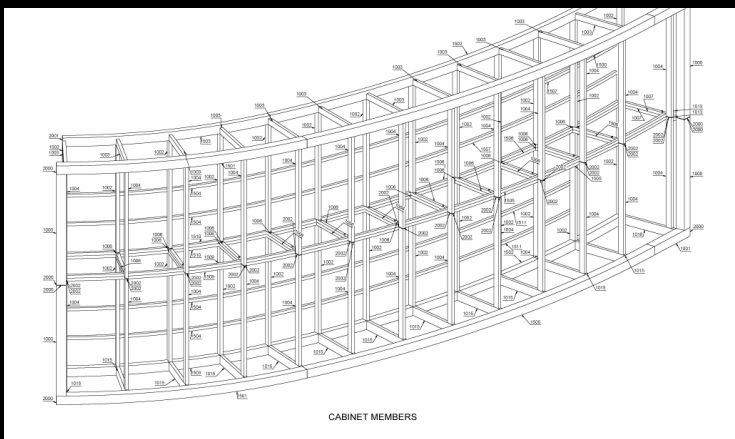

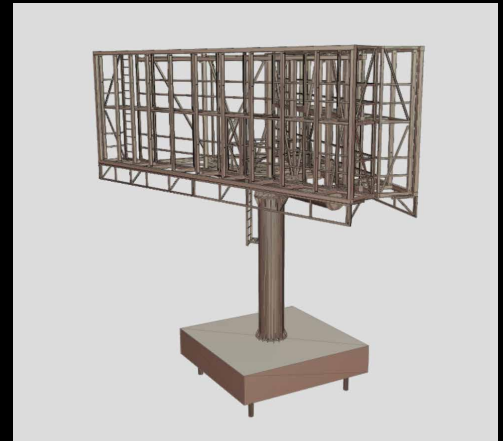

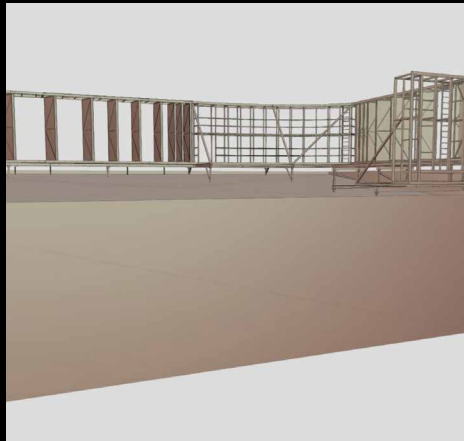

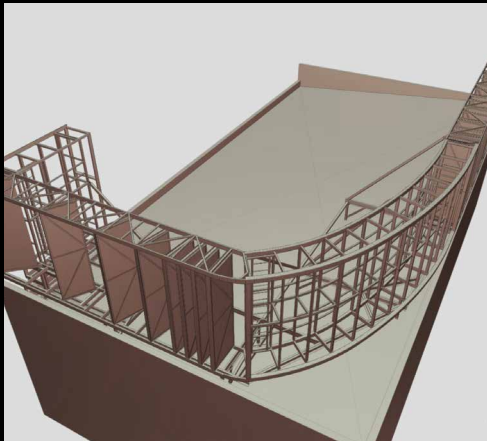

ENGINEERING, DRAWINGS & INSTALLATION SUPPORT

We're not just a sign shop - we speak construction.

- SS Signs delivers construction-ready signage with full technical support and documentation at every stage.
- Shop drawings and installation documentation included with all custom structures
- Engineering sign-off for footings, fabrication, and wind loads (AS/NZS compliant)
- 3D concept previews via Sketchfab - interactively view signage from all angles and elevations
- Experienced with Tier 1 builder protocols, crane lifts, high-access installs & CBD permits
- Council approvals and compliance assistance where required
- Fully qualified install crews: White card certified, site-inducted, and high-risk environment trained

Seamlessly integrated into your build process, our signage solutions are engineered to be right the first time - on time and to plan.

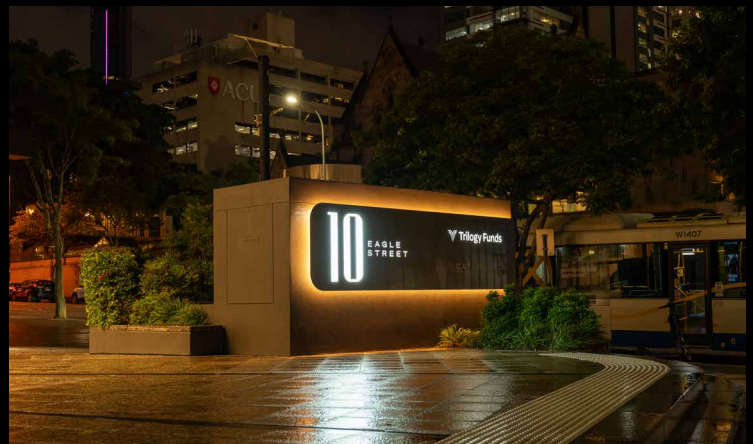

LED & ILLUMINATED SIGNAGE

We supply high-quality LED displays using both DIP and SMD technology, suited for both internal and external use across development projects.

Our services include:

- Product selection and placement recommendations based on environment, viewing angle, and resolution needs
- Structural fabrication and installation, including footings and mounting
- Integration of software for remote content updates and scheduling
- Long-term servicing and support for signage lifecycle management

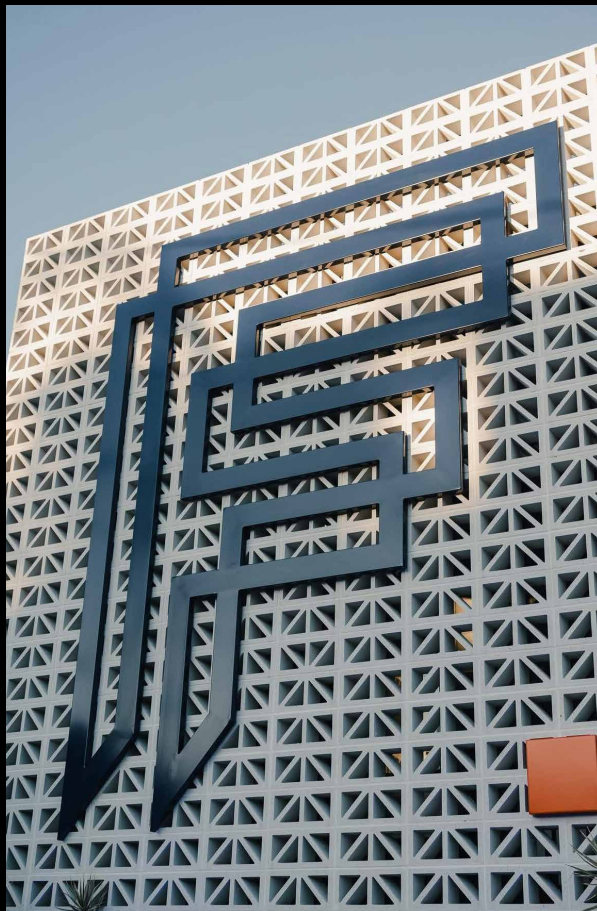

SUPPORTING YOU BEYOND INSTALLATION

We offer ongoing service, maintenance, and upgrades for all permanent signage. For our construction clients, we also offer:

- Ongoing signage for staged releases and extensions
- Replacement of damaged or weather-worn signs
- National program management for builders with repeat requirements

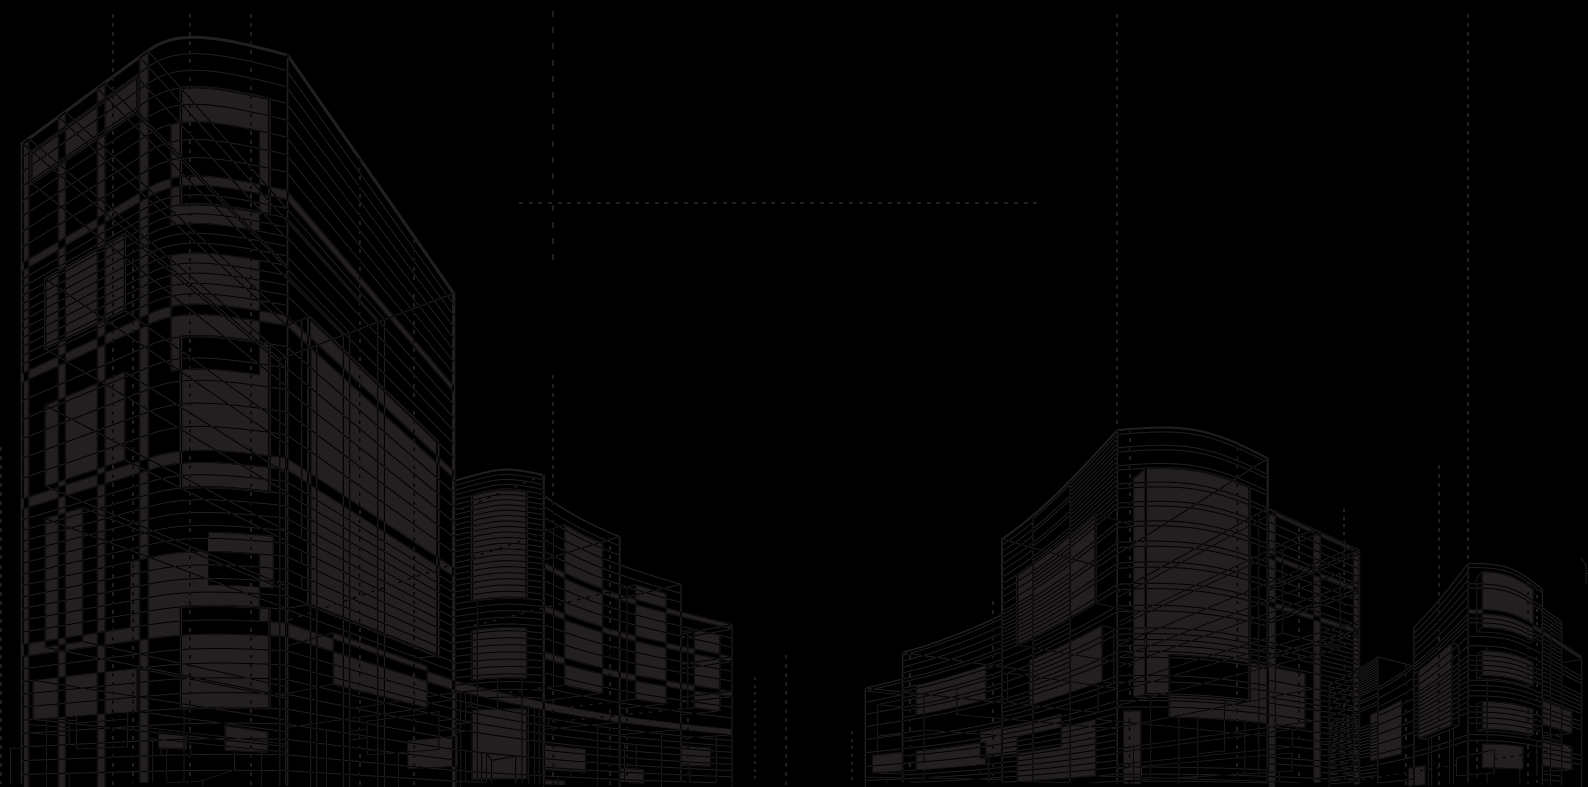

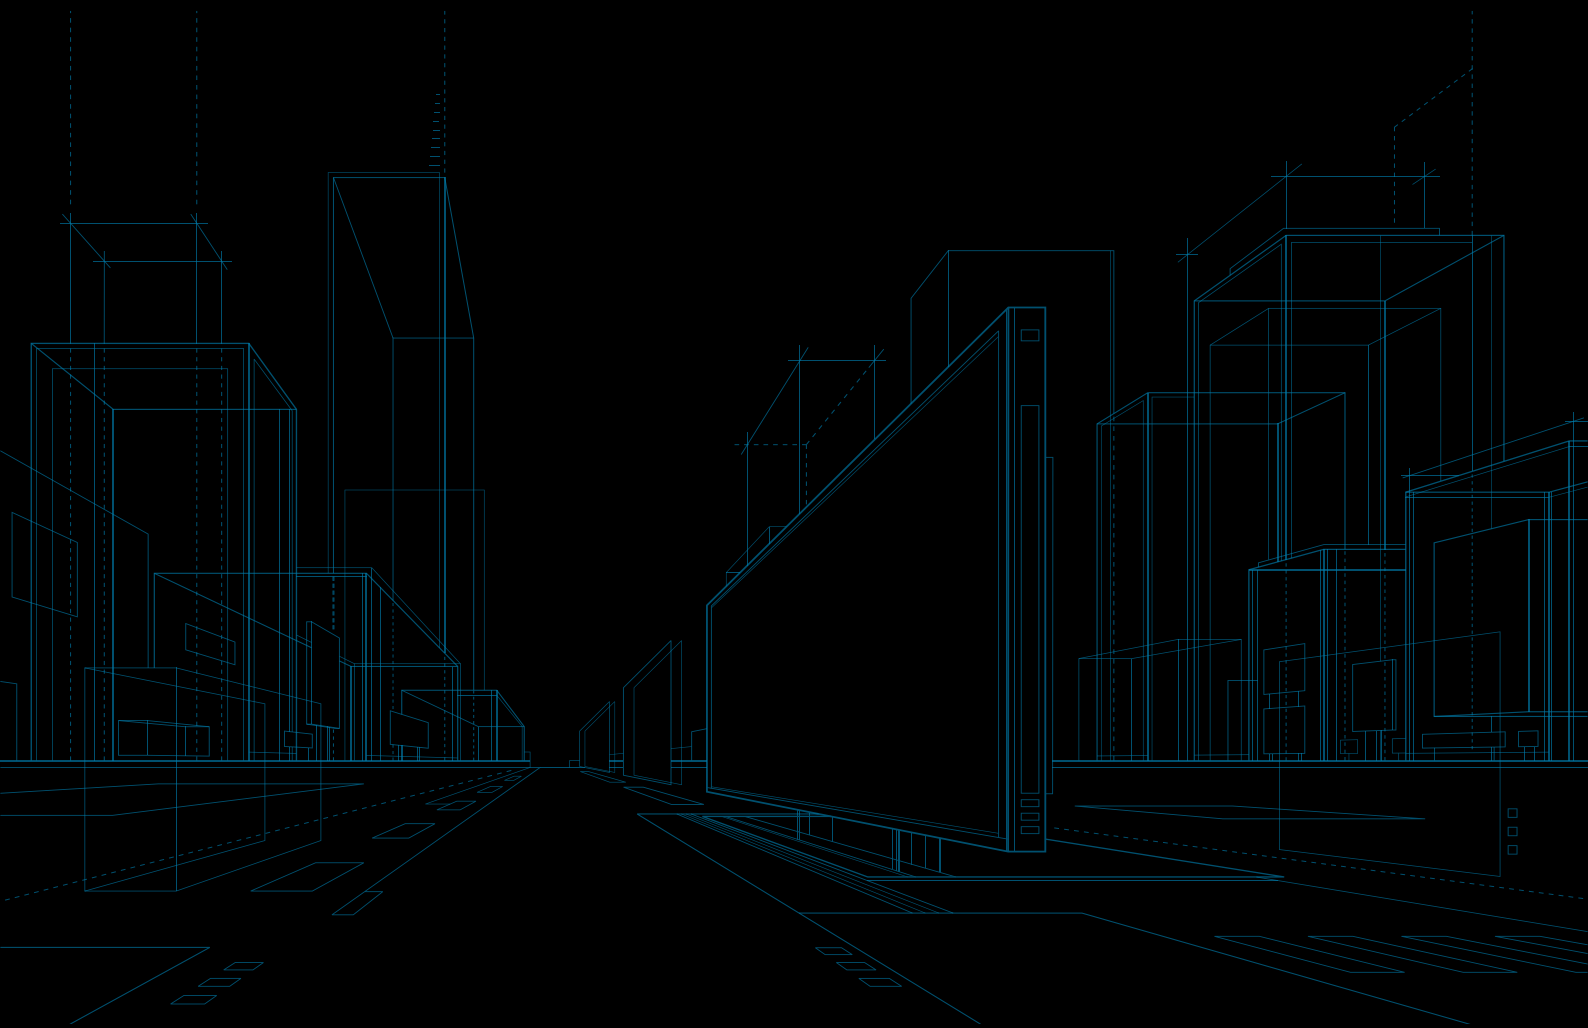

A TRACK RECORD YOU CAN TRUST

Our signage is found across Australia's leading retail precincts, residential developments, business parks, universities, hospitals, and transport corridors. Our team of over 70 signage professionals include industrial designers, engineers, production specialists, project managers, and installers who understand what it takes to meet deadlines, exceed expectations, and build signage that lasts.

OUR PROMISE TO DEVELOPERS & BUILDERS

- We deliver on time, to spec, and with minimal disruption to your site
- We bring experience, foresight, and professionalism to every stage of the project
- We back our products with a 100% satisfaction guarantee and Australia's highest 3M MCS warranty accreditation
